---

By the way, it's a Remington 1100 shot gun, if that makes any difference

1. [serial number gun check online](#)

The gun is in great shape and that isn't the reason for the question I just want to know more about the gun itself.. Does anyone know if there is an easy (read, through the internet) way to tell when a particular gun was manufactured by way of its serial number? Is there a website or something out there I can consult? I am about to pick up a used gun I just bought from a dealer but he doesn't know the exact history of that gun.
